# Follow the below steps to get the TACIT source code:
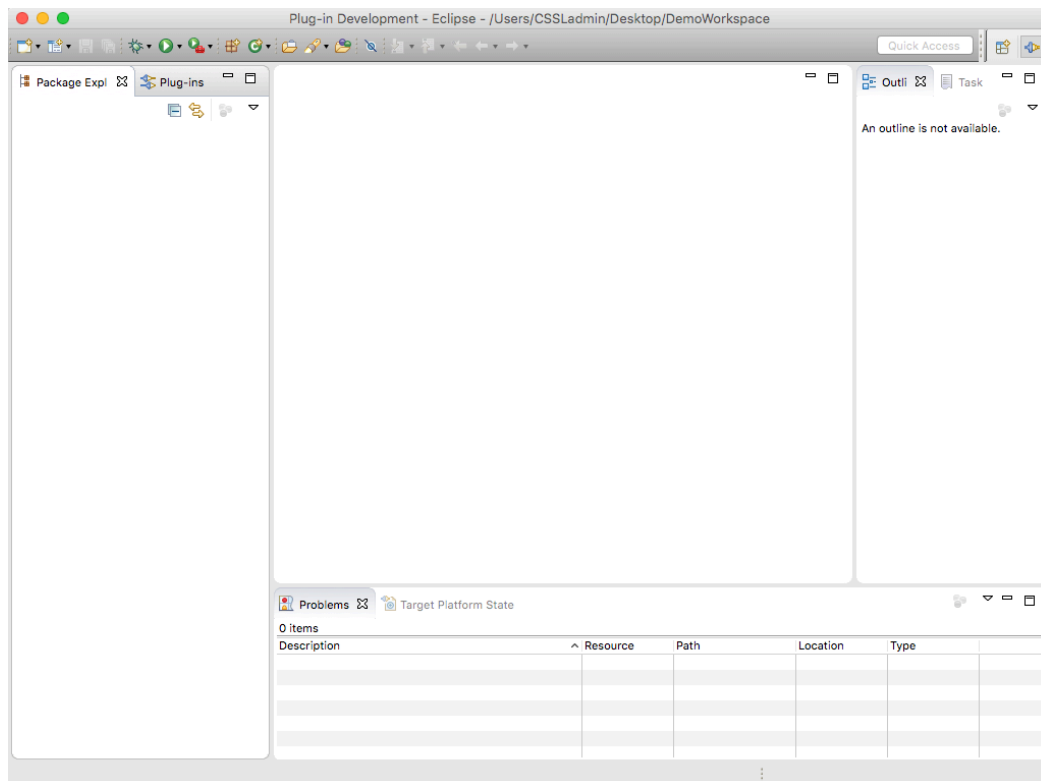

Step 1:
Download and install 'Eclipse for RCP and RAP Developers' from
www.eclipse.org/downloads/

## Step 2:
Start Eclipse.

Step 3:
Now import the project in Eclipse from Github by following steps:

i) Go to **File>Import.**

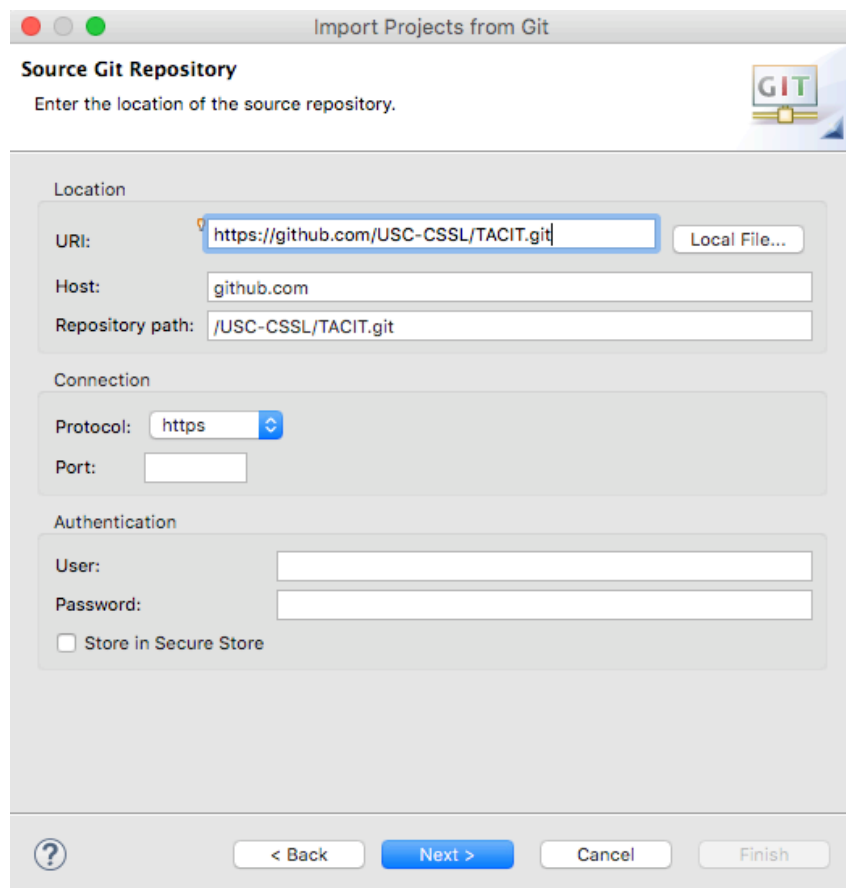

ii) Select the option "Project from Git".
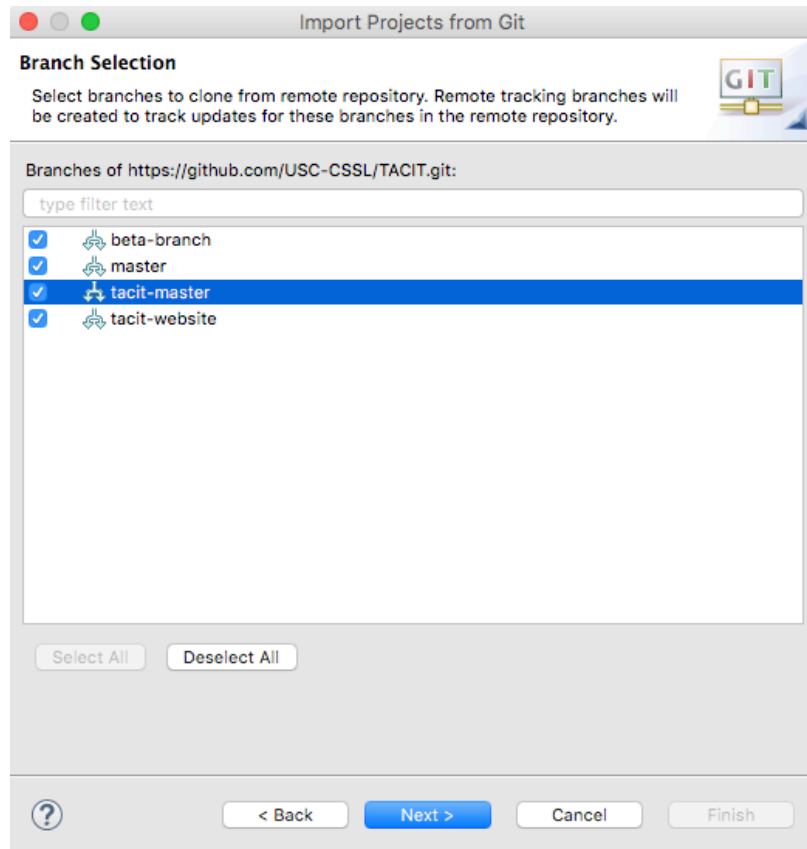

iii) Select "Clone URI".

iv) Enter the URL https://github.com/USC-CSSL/TACIT.git in the textbox.
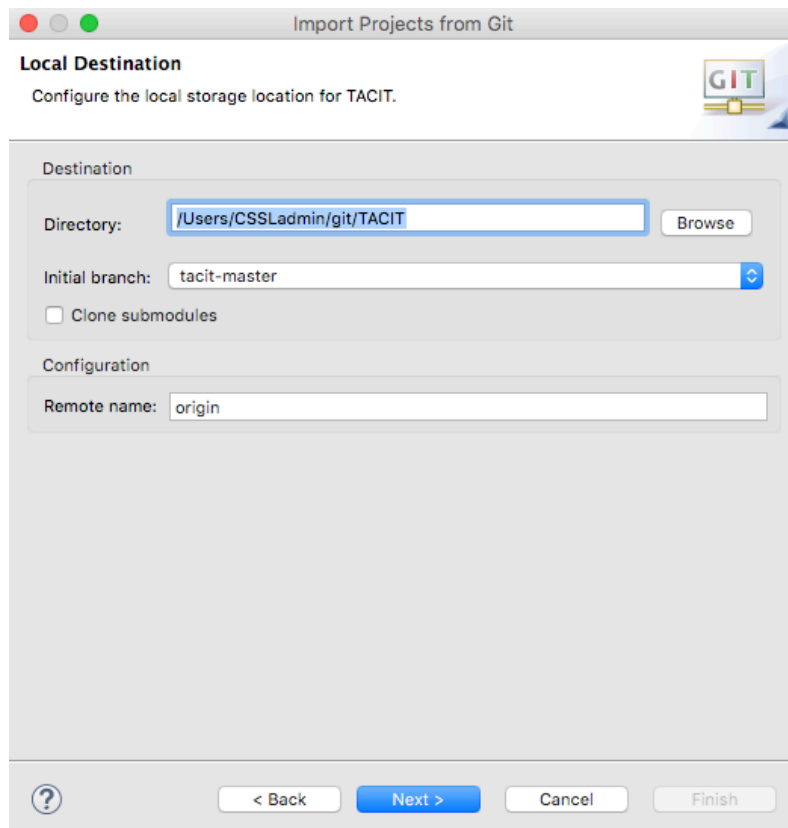

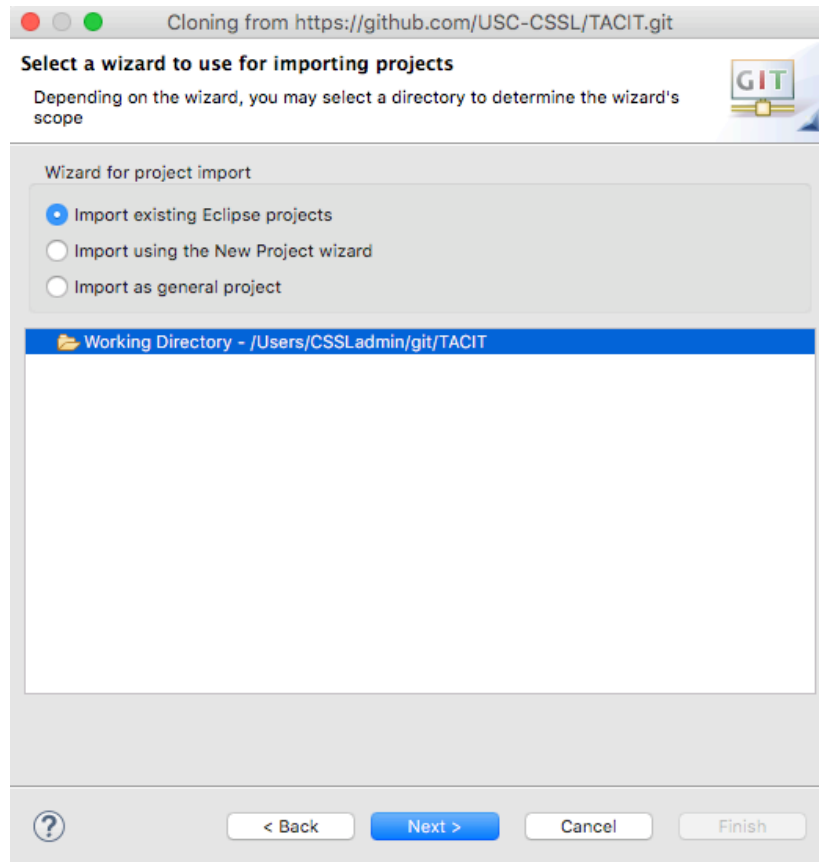

v) Select tacit-master.

vi) Select the location for local storage of project.

vii) Check 'Import existing Eclipse projects' and select location of your local project.

viii) Select all the projects and click finish.

Step 4:

To test the application, expand the project folder **product**, open **tacit.product** file and select 'Launch an Eclipse Application'.
